

Office of Sevier River Commission

DELTA, UTAH R.F.D. 84624

December 2, 1974

W. ROGER WALKER

CENTRAL UTAH WATER CONSERVANCY DISTRICT
Mr. Michael B. Georgeson, Engineer
P.O. Box 427
Orem, Utah 84057

Dear Mike,

The stations to be operated for 1975 are:

1. Beaver & Bullion Creeks (5 diversions)
2. East Fork above Antimony
3. Coyote - East Fork Canal
4. Otter Creek above Angle
5. Monroe Creek above Diversions
6. Avery Ditch
7. Venice Pump - rate power meter
8. Cove River
9. Richfield drain into Vermillion Canal (occasional measurement)
10. Salina Creek Diversion
11. Lost Creek above Diversion (1 + flows going to river)
12. Redmond Lake
13. Willow Creek above Diversion (2 stations)
14. Sanpitch River at West View Bridge
15. Landes Check - Central Utah Canal
16. Chicken Creek releases - Daily observation
17. Mohlen Springs
18. Six Mile Creek

Some method other than recording systems will be employed to gather data at a few of the points. In addition miscellaneous measurements will be taken at a number of places to be correlated with recorded stations. Some of these would be Springhill Ditch, Peterson Users et.al. North & South Cedar Ridge. I believe the total project would be equivalent to twenty-two recording stations. It was on this basis that the Central Utah Water Conservancy District would be placed on the assessment rolls for the \$ 11,000.

If you need any additional information please let me know.

Sincerely,

Roger

ROGER WALKER
Sevier River Water Commissioner
